We employ a strategy of integration and company engagement/voting, meaning our team researches the companies we invest in and actively checks for any environmental, social or governance (ESG) risks that may apply. It helps our Portfolio Manager develop an understanding of each company, and influences not only whether we invest in companies, but also how much. This fund also includes negative screening to remove companies whose business activities may lead to significant harm. Zero-tolerance exclusions include the production of tobacco, nuclear explosives, cluster munitions, anti-personnel mines, pornography and controversial firearms. Additional information on screening thresholds and processes are outlined in our ESG Policy and the fund Statement of Investment Policy & Objectives (SIPO).

## About the Fund

An actively managed high conviction fund which invests principally, through both long and short positions, in listed Australasian equities.

## Fund benchmark

The Fund is not managed in relation to a benchmark. However, we report performance against: S&P/NZX Bank Bills 90-Day Index plus 2%.

To calculate the risk indicator we use: 15% S&P/NZX 50 Index; 15% S&P/ASX 200 Index & 70% S&P/NZX Bank Bills 90-Day Index.

## Fund purpose

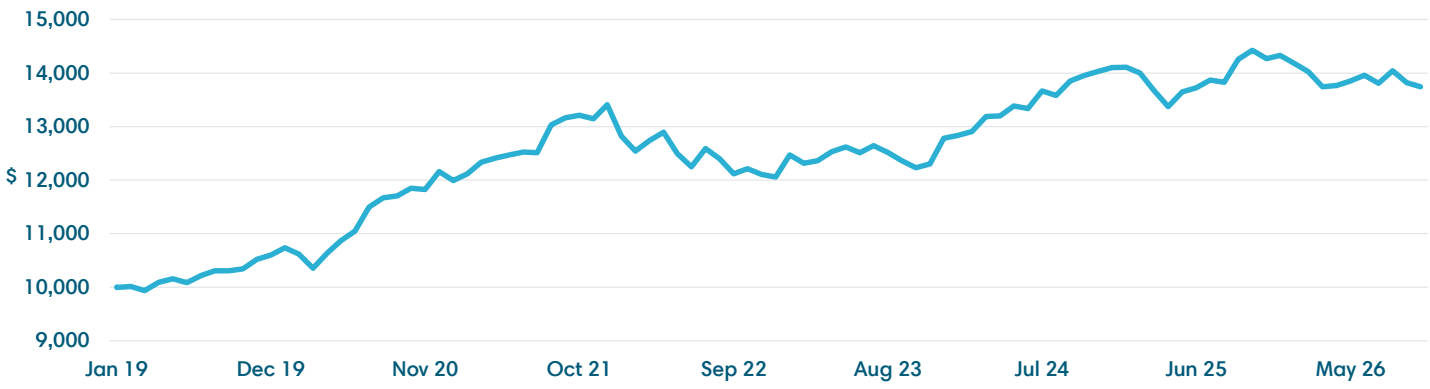

The Fund is designed to deliver positive absolute returns through the economic cycle with low volatility and low correlation of returns with equity markets.

## Investment approach

The Fund principally holds 'long' and 'short' positions in listed Australasian equities reflecting our conviction in their likelihood of providing medium to long term capital growth. We can actively allocate investments between Australasian listed equities, fixed interest and cash. The Fund may also use derivatives to hedge currency and equity risk.

## About the Fund

An actively managed fund designed for investors who want liquidity and a higher return than short-term interest rates would generate at a bank.

## Fund benchmark

S&P/NZX Bank Bills 90-Day Index.

## Fund purpose

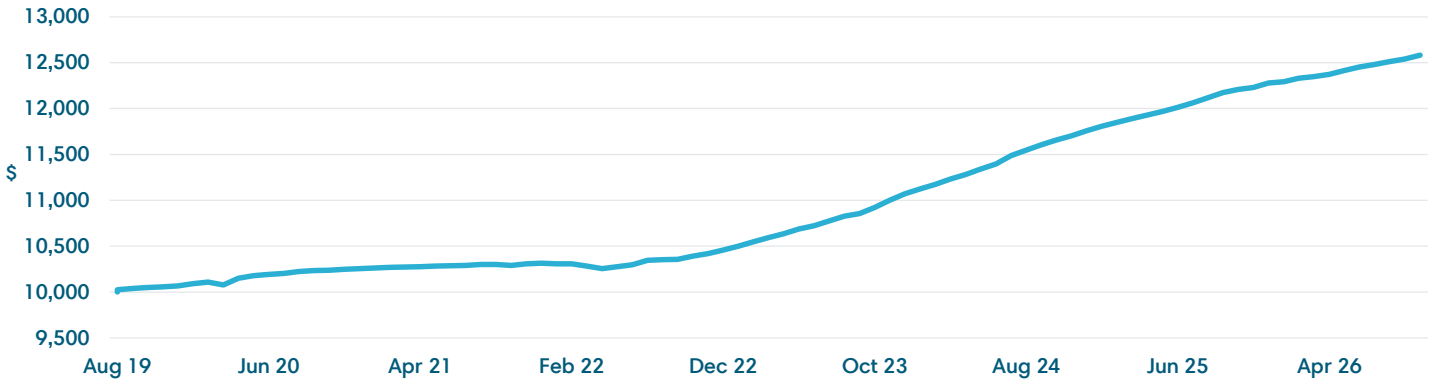

This Fund is designed as a short term, higher liquidity and lower volatility investment option. The objective of the Fund is to outperform the benchmark of the portfolio by 85 basis points per annum over a rolling 3-year period.

## Investment approach

This Fund holds liquid money market securities, NZ Government stock, corporate bonds and term deposits. It aims to generate returns in two ways: using Harbour's research-driven process to capture the higher yield that longer term securities can offer, then actively managing liquidity and interest rate exposure so funds are available when investors need them.

## Responsible/ethical investing

We use external manager T. Rowe Price for this fund. T. Rowe Price employ a strategy of integration and company engagement/voting, meaning their team researches the companies they invest in and actively checks for any environmental, social or governance (ESG) risks that may apply. It helps their Portfolio Manager develop an understanding of each company, and influences not only whether they invest in companies, but also how much. We only engage external managers who prove to us that they meaningfully integrate ESG into their investment decision making process. We undertake regular due diligence including independent carbon footprint analysis, and engage regularly with their team on management of ESG issues. Information on screening thresholds and processes are outlined in our ESG Policy and the fund Statement of Investment Policy & Objectives (SIPO).
