What are the risks of investing?

Risk indicator for the Harbour T. Rowe Price Global Equity Fund (Hedged)

A combination of actual Fund returns and market index returns have been used to determine the risk indicator for the Harbour T. Rowe Price Global Equity Fund (Hedged) (inception 1 October 2021), as the Fund has not been operational for the required 5 years. The risk indicator may therefore provide a less reliable indicator of potential future volatility of this Fund.

The risk indicator is rated from **1 (low) to 7 (high)**. The rating reflects how much the value of the Fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 years to 31 December 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this Fund.

How has the Fund performed?

	Past Year
Annual Return¹ (after deductions for charges and tax)	10.47%
Annual Return¹ (after deductions for charges but before tax)	11.58%
Market index annual return¹ (reflects no deduction for charges and tax)	19.18%

The market index annual return is based on the weighted average return of the market indices used to measure performance of the underlying fund. In this case the Market Index is the MSCI All Country World Index (100% Hedged to NZD). Additional information about the market index is available on the offer register at <https://disclose-register.companiesoffice.govt.nz/>.

Annual Return Graph²

This shows the return after Fund charges and tax for each year ending 31 March since the Fund started. The last bar shows the annualised annual return since the Fund started up to 31 December 2025. The Market Index returns do not include any tax, expenses or charges.

Important: This does not tell you how the Fund will perform in the future. Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Fund are charged fund charges. In the year to 30 June 2025 these were as follows:

	% of net asset value
Total fund charges (Inc. GST)	1.24%
Which are made up of:	
Total management and administration	1.24%
Including-	
Manager's basic fee	1.14%
Other management and administration charges ³	0.10%
Total Performance-based fees	0.00%

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the PDS and Other Material Information Document OMI for more information about fees. Also see the product disclosure statement for more information about the basis on which performance fees are charged.

Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Jenny had \$10,000 in the Harbour T. Rowe Price Global Equity Fund (Hedged) at the start of the year and did not make any further contributions. At the end of the year, Jenny received a return, after fund charges were deducted, of \$1,158 (that is 11.58% of her initial \$10,000). This gives Jenny a total return after tax of \$1,047 for the year.
